Enhancing collaborations between Birth Defects and Environmental Public Health Tracking Programs
Moderator: Phil Cross, New York State Department of Health, Troy, NY

Heather Strosnider, National Center for Environmental Health, Centers for Disease Control and Prevention, Atlanta, GA
Phil Cross, New York State Department of Health, Troy, NY
Russel Rickard, Colorado Department of Public Health and Environment, Denver, CO
Russell Kirby, University of South Florida, Tampa, FL

This session will begin with an update on national and state/local activities from the National Environmental Health Tracking Program that relate directly to birth defects. Then the session will cover Tracking Program activities which may be of interest to the NBDPN. This will include discussions on data available on the Tracking Network, data visualization and mapping, linking health and environmental data, data sharing and transport, and secure portals. NY will demonstrate their secure portal and discuss its development and utility. Substantial time will be left for discussion on ideas for expanding and enhancing collaborations between the Tracking Program and NBDPN.
