Virginia Hospital Center
Implementing ICD-10

Cindy Chabolla, RHIA, CCS
Assistant Director, HIM
AHIMA Certified ICD-10 Trainer
29 February 2012
Virginia Hospital Center

- 342 Beds
- Med/Surg; Orthopedics; Neurology; OB;
- Cardiology; Cancer Treatment; Psych; Cyberknife; Wound Care Center; Bariatric Surgery
- 17 Coders – code everything except Ancillary Lab
- Most Coders work remotely
- 2 Clinical Documentation Improvement Specialists
• Began reviewing and thinking about a strategic plan for transitioning to ICD-10
• Invited an outside consultant to come in and speak to Department Heads on ICD-10 and what was on the horizon
• Coding Manager attended AHIMA ICD-10 Train the Trainer class
Created a Project Committee

Committee Members

- Director of HIM
- Assistant Director of HIM/Coding Manager
- Director of IT
- Representative from Project Management Office
- HIM Executive Assistant
A Guide for the Project

- Established Responsibilities for the project
- Created a Steering Committee
- Set timelines and milestones
- Identified expected outcomes
- Considered possible obstacles
Contracted for Consultant Support

• Interviewed and researched three companies
• Analyzed their assessment capabilities
• Selected a vendor
Goals for the Assessment

- Inventory and analyze all internal and external programs
- Contact all external vendors and payers to assess readiness
- Analyze current use of ICD-9 codes and potential use of ICD-10 codes
- Help determine training and staffing needs
Current Activities

• Considering purchase of Computer Assisted Coding
• Using CDI Specialist to look at physician documentation needs for ICD-10
• Training a core group of experienced staff to become lead ICD-10 coders
• Planning for coder training
Next Steps

2012
• Will begin educating physicians
• Anatomy and Physiology for the coding staff
• Test Systems and Payers

2013
• Train Coders
• Practice, Practice, Practice
• Test, Test, Test
Post Implementation

- Review and audit coding
- Continue Coder training
- Monitor claims and remits
- Follow-up reviews with reporting and registries
What you can do as a registry

• Prepare your programs to accept the ICD-10 code sets and ICD-9 code sets simultaneously
• Be ready to test data from hospitals if requested
• Be prepared to provide documentation that can be submitted to a hospital to show your ICD-10 readiness
