

*Friday, January 23, 11:00AM-12:00PM*

*2:15-3:30PM*

*Educational Workshop (Workshop repeats in the afternoon)*

***We've got the data... where do we go from here?***

April Montgomery, Colorado Responds to Children with Special Needs, Denver, CO

Russell Kirby, Department of Maternal and Child Health School of Public Health, University of Alabama at Birmingham, Birmingham, AL

This educational session will explore the application of birth defects surveillance data to enhance public health programs serving women, children and their families. Examples will be provided, focusing on early intervention, CSHCN, developmental disabilities, and newborn metabolic and hearing screening follow-up programs. We will also discuss participation in collaborative research projects and the use of birth defects surveillance data in reports and publications.
